On November 29, 2009 at 3 am in the morning, 3 year old , Imanaе, spilt hot water on her wrist, her parents rushed her to Doctors Hospital. Emergency ward staff, who applied an ointment on her hand and gave her an injection to soothe the pain. When Imanaе continued to cry because of the pain, the nurse called the doctor on duty. The doctor instructed the nurse to give Imanaе another injection. Imanaе however continued to cry. Fifteen minutes later, the sleepy doctor instructed the nurse to inject Imanaе with the 3rd injection. All in all, 5mg of this anesthetic/pain killer was given.

At this, Imanaе’s Father said:

**This was the moment when my little baby went silent and started losing consciousness. Just before she totally passed out, she started calling out my name and saying that everything was getting blurred and she couldn’t see clearly. Little did I know that these were the last words my daughter would ever say.**

Feeling her breathless, father called the doctor but he justified she is fine and is just sleeping, and left the room. When father didn’t get satisfy, Imanaе was checked with Heart Beat Monitor, but no reading. ECG showed straight line. Meanwhile doctors kept on stating that she is fine, just having some breathing problems. Doctors wasted 20 minutes in conversations on it meanwhile proclaiming that the child is ok.

Then one of the doctor told that Doctors Hospital do not have baby ventilator so parents should move her to some other hospital. Father asked them for an ambulance because she was connected to all kinds of machines but they said to wait for 30 minutes as no ambulance is present at the moment. At this father took her in his own car and pleaded one of the doctor to come along to Children’s Hospital, asked for list of injections and other medicines given to her and ECG report – but nothing was given except the Ward Boy to go along.

It hardly took 15 minutes when they reached Children’s Hospital where they were told that 3 year kid was already dead.

#### **Message By Imanaе’s Father:**

With your help, I have discovered several other cases that strongly indicate malpractice and gross negligence by this hospital. If you are a victim of Doctors Hospital or know of someone who suffered at their hands, please let us know so that we can put it forward and bring the culprits to justice
